AI-Powered Insights Using Google Sheets + Notion AI

Summary (Demographics & Global Data)

From the first table showing age and gender distribution:

- The data spans ages 17-24 across different genders (Female, Male, Other)
- Age 20 has the highest total count with 146 students
- Gender distribution is relatively balanced between females and males
- The "Other" gender category consistently shows smaller numbers (2-7 per age group)

From the second table showing country-wise statistics:

- The USA, UK, and Singapore show the highest values in most metrics
- Total global metrics:
 - Overall sum: 15,151,450
 - Aggregate value: 58,444.8
 - Combined metrics: 879,070
 - Regional distribution: 191,737
 - Category total: 634,970
 - Final metric: 565,061.63
- Notable variations exist between developed and developing nations across all metrics
