

Elevator pitch

Hi, I am Adza Rajasekhar, and I am currently pursuing my master's degree in statistics from Loyola College. I got interested in Data science and ML during my bachelor's degree, which led me to explore more in my master's. I have worked on ML projects, solving Health insurance recommendation systems and CTR for online advertisements using ML models like XGBoost and Random Forest, and NLP to study customer sentiment analysis. I interned at [Rasa.AI](#) labs, where I created a Python-based ML system with an included AI chatbot, using Python, API, and Custom AI agents. I am excited and looking forward to joining your team and contributing my expertise in statistics and exploring the opportunities in AI.
